

Dear CIRB Stakeholders,

This is to let you know about recent administrative changes in the CIRB Operations office. Capital Technology Information Services, Inc., the lead contractor on the Initiative, has new partners. They are The EMMES Corporation and Western IRB. The EMMES Corporation is known for clinical trials management and has many years experience providing administrative and programmatic services to NCI. Many of you are already familiar with Western IRB. Under the new structure, EMMES will be conducting all operations and Western will be providing regulatory support. As a result of these changes, there are new staff to support you. They are:

Laura Covington
Director, CIRB Operations and Acting-Pediatric Coordinator

Josh Lorenzo
AE/SAE Coordinator and Enrollment Specialist

Diana Orr
Help Desk Support

Cynthia Perry
Adult Coordinator

Additional information will be sent in a separate broadcast about to how to contact the operations office at EMMES.
